

WellMix Max Crop

INSTRUCTIONS FOR STORAGE AND USE

Well Mix max Crop is a unique formulated blend of Manganese/Copper and Sulphur complexed with lignated humic acids and adjuvants for improved tank mixing compatibility.

- APPLICATION RATE 1-2 lts/ha in 200 lts/ha water. Repeat applications may be required where moderate-severe deficiency is known or identified by analysis.
- MIXING AND SPRAYING Three quarter fill spray tank. Shake container and add slowly to the tank whilst agitating. Top up with water and spray. Wash hands before meals and after work. Safely dispose of empty container. WellMix Max Crop is physically and chemically compatible with a wide range of agrochemical products. Information is available from Cropwell Ltd.
- APPLICATION TIMINGS Early tillering to second node detectable (Zadok's Growth Stages 14-32). For Autumn sown crops an application prior to Winter dormancy is strongly recommended. Susceptible to Manganese/Copper deficiency, apply as early in the season as possible, providing there is adequate leaf cover.
- STORAGE In a clean dry store above 0°C.

E.E.C. Fertiliser for use as a Manganese/Copper nutritional supplement for agricultural/ horticultural crops by foliar application to be used only where there is a recognised need. Do not exceed the appropriate application rates.

CONTAINS	Fertiliser in Manganese based solution soluble in water.			
		w/w	w/v	gms/litre
Sulphur Solution as Sulphur Trioxide	(SO3)	14.20%	18.60%	186.0g
Elemental Sulphur	(S)	5.70%	7.50%	75.0g
Copper solution as Elemental Copper	(Cu)	1.60%	2.10%	21.0g
Manganese Solution as Elemental Manganese	(Mn)	8.00%	10.50%	105.0g

SAFETY PRECAUTIONS:

R48 RISK OF SERIOUS DAMAGE TO HEALTH BY PRLONGED EXPOSURE IF SWALLOWED
R51/53 TOXIC TO AQUATIC ORGANISMS. MAY CAUSE LONG TERM DAMAGE IN THE
AQUATIC

ENVIRONMENT.

S(2-) KEEP OUT OF REACH OF CHILDREN

PROTECT FROM FROST
